Interior cladding

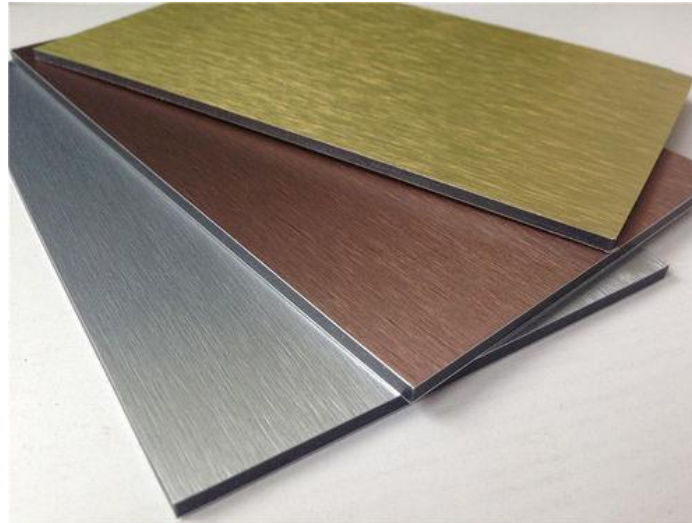

Aluminum Composite Panels

Specifications

Aluminum Composite Panel (ACP) is manufactured with American Technology. The Panel is a composite consisting of two layers of Aluminum skin sandwiching a Thermoplastic core in a continuous co-extrusion process.

Features

- Lightweight, extreme rigidity and flatness resulting in an economical option for high quality building facades and interior claddings.
- Weather resistance combined with high acoustics, Thermal and Fire rated values.
- Easy machinability gives the flexibility of shapes making it a versatile panel to achieve complex designer solutions.

Applications

Commercial:

Circular Columns
Building Facades
Wall Paneling Concepts
Soffits and Beams
Metal Ceilings and Partitions
Exhibition and Display Stands
Shop fronts and Signage
Window Surrounds
Door Panels and Frames

Mobile Business Units:

Compartment Partition.
Storage units and Drawers.
Interior cladding

Production

Due to our vast range of products our capacity varies depending on the demand. Weekly production meetings, stringent scheduling and planning procedures are in place to insure all our departments run smoothly so our customers receive their vehicles within the promised delivery period. We have the capacity to run 12 mass production lines at the time.

Quality Control

We pride ourselves on our reliability procedures. Every vehicle has to pass through stringent tests and checklists. Our procedures are implemented throughout production at various stages of the work. Every aspect of the vehicle is tested thoroughly before the vehicle is released from our workshop. We deliver for full customer satisfaction.

After Sales Service

An integral part of our company, people's lives and businesses depend on the vehicles operating effectively and Jorefco is here to help you. We offer a full service/ maintenance package with warranty and emergency roadside assistance is available in some regions. We will give your vehicle a maintenance inspection after every 5000 miles.
